Secrets of Building a Plastic Injection Molding Machine Vincent R. Gingery

Creating with plastic can be fun and can be a profitable hobby as well. But most plastic components these days are created by huge, expensive plastic injection molding machines. Molten plastic is forced under enormous pressure into intricate molds. On the surface it appears to be a technology well beyond the realm of the home shop. At last, here is the book that simplifies this technology making it possible for you to inexpensively injection mold small parts from common recycled plastic. You get complete step-by-step instructions revealing the secrets of building a small inexpensive tabletop injection molding machine capable of molding up to a half ounce of plastic. Although a half ounce may not appear to be much plastic, the truth is, that it is more than enough to produce many small useful items. Best of all you'll be molding with plastic recycled from milk jugs, soda pop bottles, plastic oil cans, and more. Your raw materials are free and plentiful. You will learn the basic principles of injection molding and how to design and make your own molds. You will start by making a simple mold to test the machine. Then you will mold a plastic knob for the machine itself. Next, you'll progress to a mold that creates a small plastic container with a snap lid. Before long you will be creating new products of your own design. You will be able to cast replacements for broken or missing parts, or you can make copies of plastic components. The possibilities are endless. The moldings are incredibly professional in quality. Your friends will never understand how you were able to do it. Injection molding is a technology that has given us an incredible standard of living. Here are the secrets that will allow you to put this technology to work in your home shop. Build a molder, and explore a whole new technology today.
