This fantastic guide to EMP attack and solar storm survival is written by the author of The Preppers Apocalypse Survival Guide book series, Steve Rayder. Steve's books have been quickly growing in popularity in the prepping community. With thousands of copies being read by preppers around the world within months of the release of the very first book.

This latest offering is packed full of information on EMP survival. This book exposes how vulnerable we really are to an EMP, it explains the different types of EMP, tells you how society would most likely react to an event like this happening, how long it would take the country to recover and exactly how you can survive until order is restored.

The information in this book will give you a huge advantage over everyone else if a powerful EMP ever were to hit us. It will probably even give you an advantage over a lot of other Preppers seeing as this book also dispels some of the common myths and misconceptions surround EMPs that most people believe.

Due to the fact that EMPs from the sun have hit us before and the fact that EMP weapons are in existence and waiting to be used, we can expect it will happen. We don't know when or how much damage it will cause, but what we do know is that if we aren't prepared, we could pay for our complacency with our lives.
